

# Hoover Happenings

For the week of

# Mrs. Suder's Third Grade Class!

In Language Arts, we are learning about Traditional Tales, Folktales, Tall Tales, Fairytales, Fables, and more.

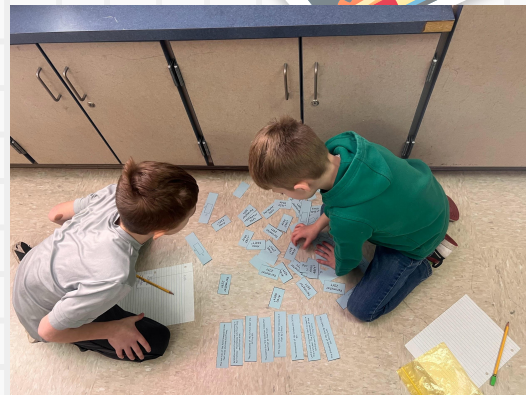

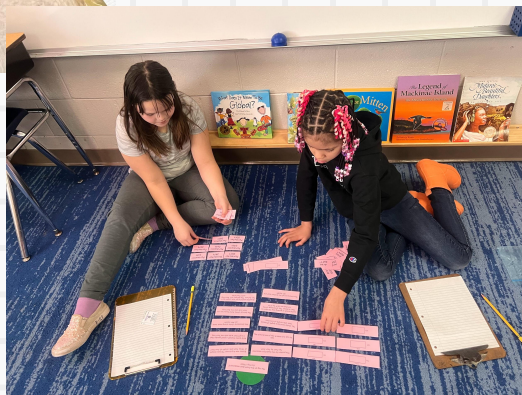

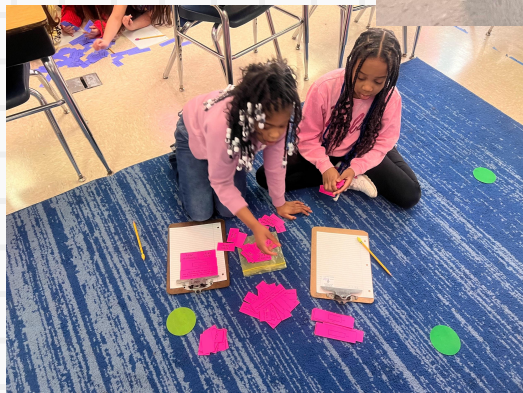

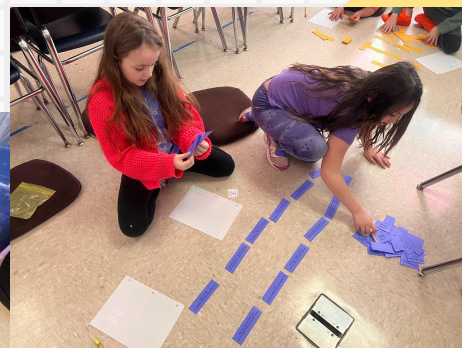

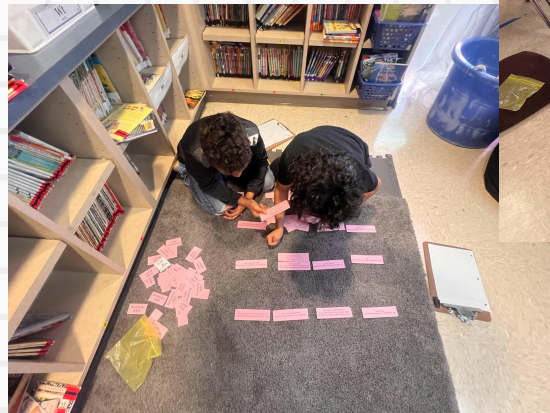

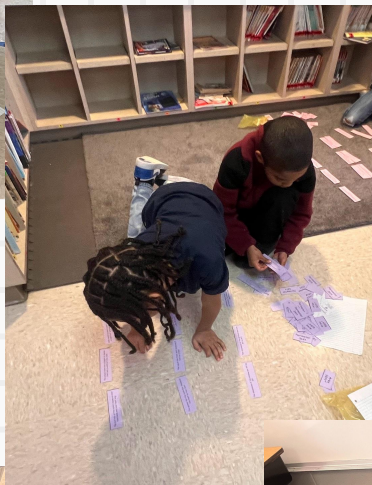

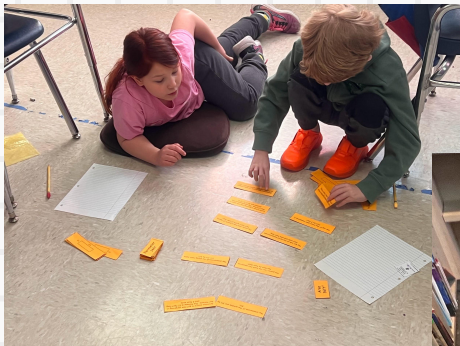

In math, we are continuing to learn about Area & Perimeter. Students were excited to work on a hands-on activity with area & perimeter instead of working in the workbook (even though it didn't go as planned and we have to try again next week ;)

In Social Studies, we are starting our History unit where students will learn all about Native Americans, timelines, how Michigan became a state, and what it was like to be a Pioneer.

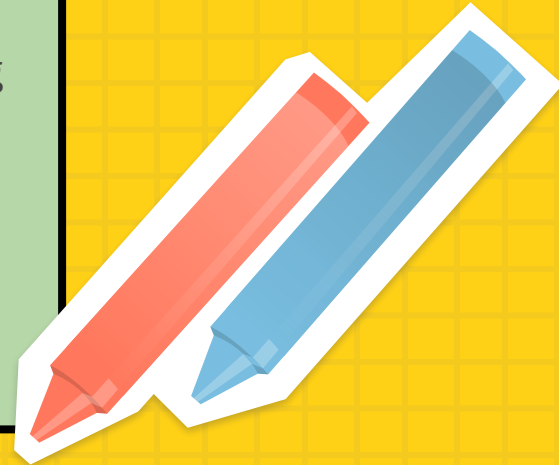

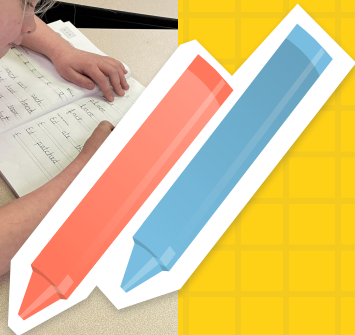

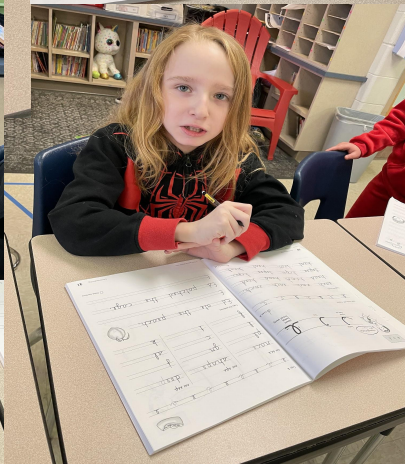

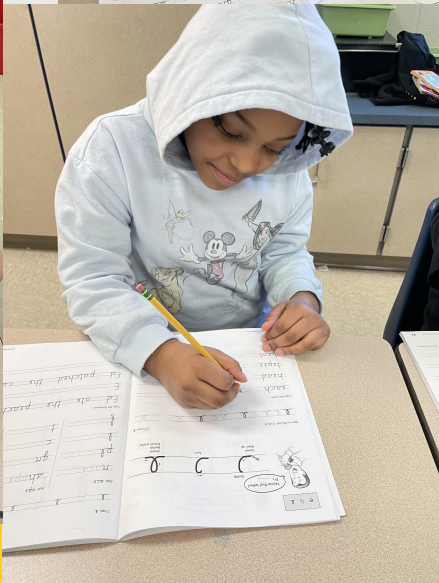

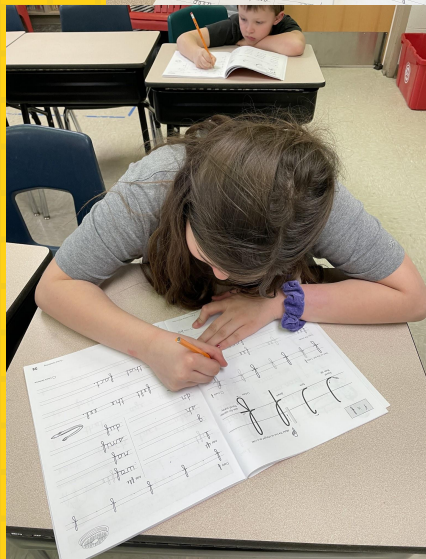

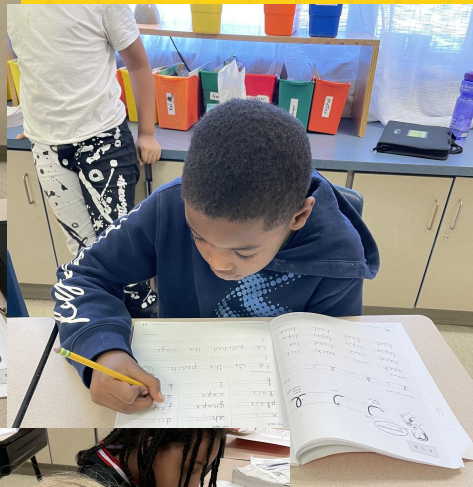

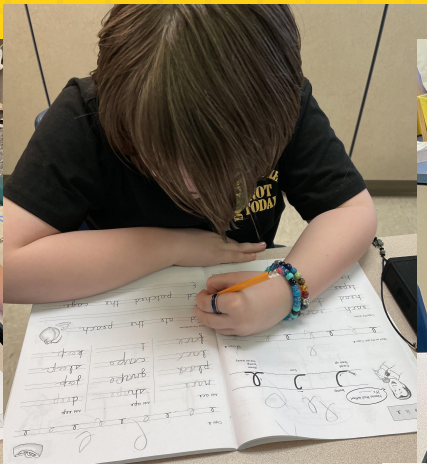

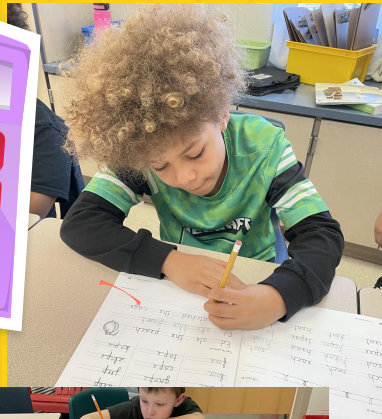

# Mrs. Parmelee's Third Grade Class

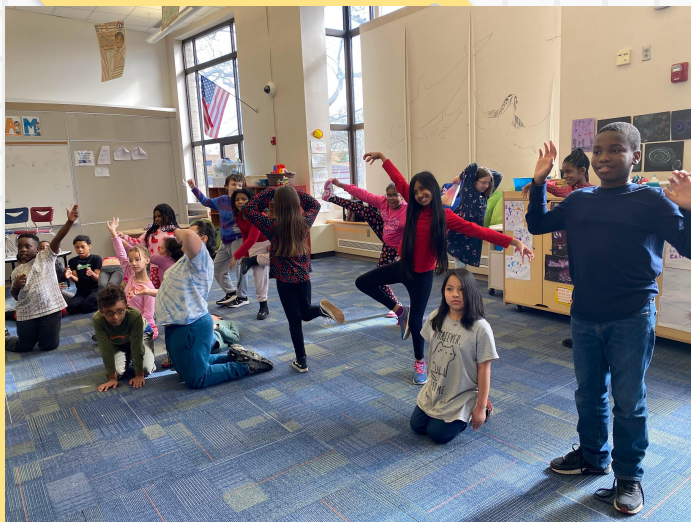

In reading we began studying traditional tales including fairy tales, legends, myths, tall tales, and more. In writing we practiced finding evidence in stories to support our opinions. In math we found area and perimeter of polygons. We also started March Multiplication Madness... so make sure to quiz your children at home on those facts!!! :) We are just beginning a social studies unit on Michigan history. We've also been learning cursive writing skills (see the pictures on the next slide).

# Mrs. Houston's Fourth Grade Class

We've been really enjoying the sun this week! Our class voted on an outdoor activities day for our PAW celebration, and we kept busy in the warm sun with chalk, football, hula hoops, gaga ball and frisbee. We're also having a wonderful time with our weekly Reader's Theater lesson. Ask us about the story we're acting out!

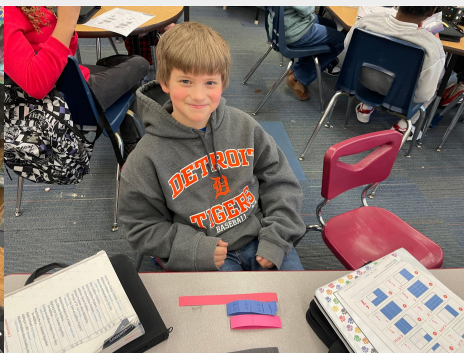

# **Ms. Johnson's Fourth Grade Class**

**Fun with Fraction  
Foldables!**

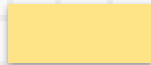

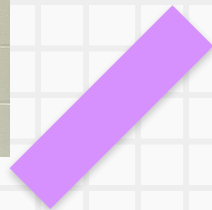

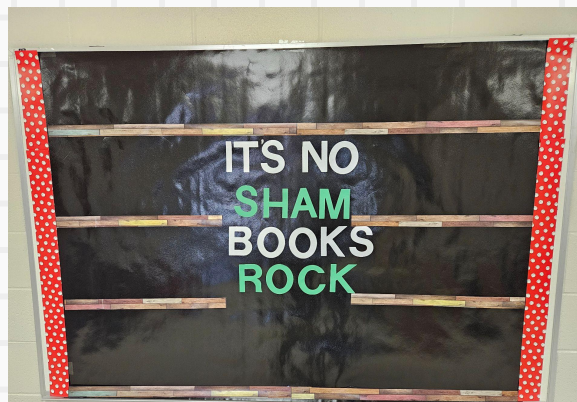

**Mr.  
LeMere's**

**Fifth Grade Class**

As March is reading month just began we are going to be filling our board with all of the books we are reading. We have crafted our 3 and 4 leaf clovers to show why we are lucky. Thank you for the wonderful attendance this week! We look forward to seeing more of you!

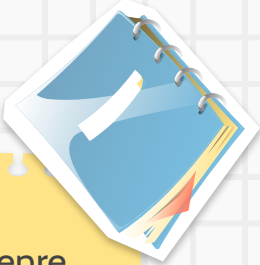

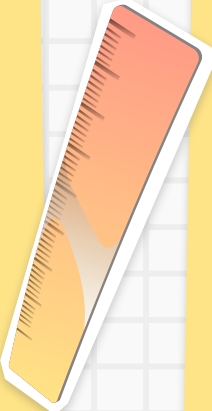

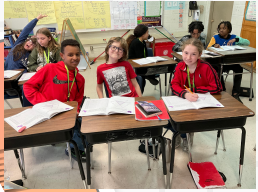

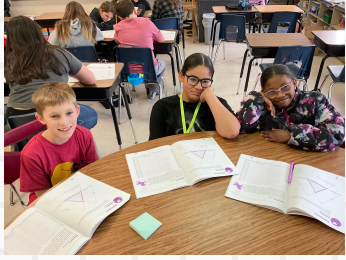

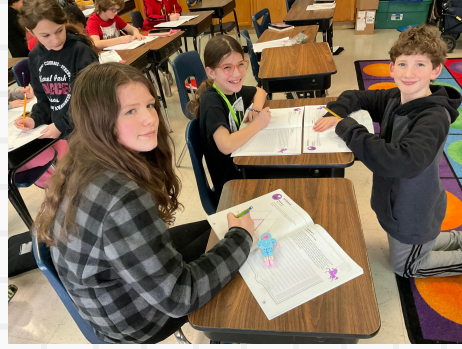

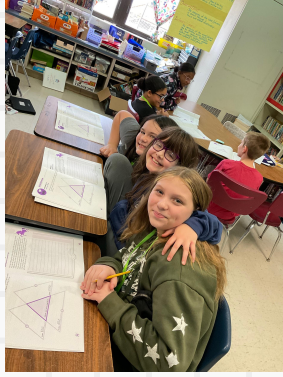

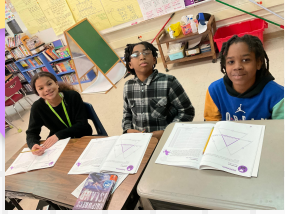

# Mrs. Bienstock's Fifth Grade Class

And we're back! This week we dove into our ADVENTURE genre and Mrs. Bienstock shared her adventures in South Carolina over the break by bringing back seashells for all of us. We had fun exploring all the neat things she and Mr. B. found on the shores of the Atlantic Ocean! We also are ROCKING mastering that standard algorithm of multi-digit multiplication! Next up...LONG DIVISION with two digit divisors!

# Ms. Surratt's Class

This week we got back into our routine. We enjoyed talking about Leap Year and did some writing activities about what we will be doing on the next Leap Day compared to now. Students have been spending more and more time with their grade level classes and have continued to grow academically and behaviorally as we focus on communication and consistency.
