Parent Newsletter

From The Principal

May 16th, 2025

Dear Jardon/Webb Community,

All of our students had the opportunity to attend the Spring Formal last night. The theme this year was "Under the Sea." Our Student Council members, as well as their advisors, provided an amazing gathering! Please look at the pictures below to see for yourself!

We are two weeks away from finishing up our third and final work rotation and card marking period. One more work report will be sent home next Thursday for you to review progress. Once the school year is completed you will receive a progress report addressing IEP goal data as well as a final work report and performance summary.

The Jardon Talent Show will be held next Friday, May 23, at 9:30 a.m. in the Webb Gym. All guests must enter through the Webb Gym doors. Our students have been practicing so they can showcase their talents. It's sure to be a good time!

Please join us on social media! Find us on Facebook by searching for Jardon Vocational School. You will see regular updates posted there about what's going on at Jardon! Please feel free to contact me at heidi.kunz@myhpsd.org or 248-658-5953, if you have any questions or concerns.

Thank you,

Heidi Kunz

Jardon's Spring Sale was a great success! It was so wonderful to see faces from the community come to support our students. During the sale, students were able to work on vocational skills like customer service, money management, advertising, and self advocacy.

We only have 2 weeks of Rotation 3 Job Sites remaining! Our last day of job sites will be Thursday, May 29th. I am so proud to have seen the growth our students have made over this rotation! I know they will continue to work diligently until the very last day.

NEWS FROM NURSE STEPHANIE

Connective Tissue: Connecting the Issues

This month, we bring awareness to connective tissue disorders, such as Marfan Syndrome, Ehlers Danlos Syndrome, and Hypermobility Spectrum Disorder. But what exactly are connective tissues?

Connective tissues are, very simply, body tissues that connect one part of the body to another. There are four types of connective tissue, which are found all around the body!

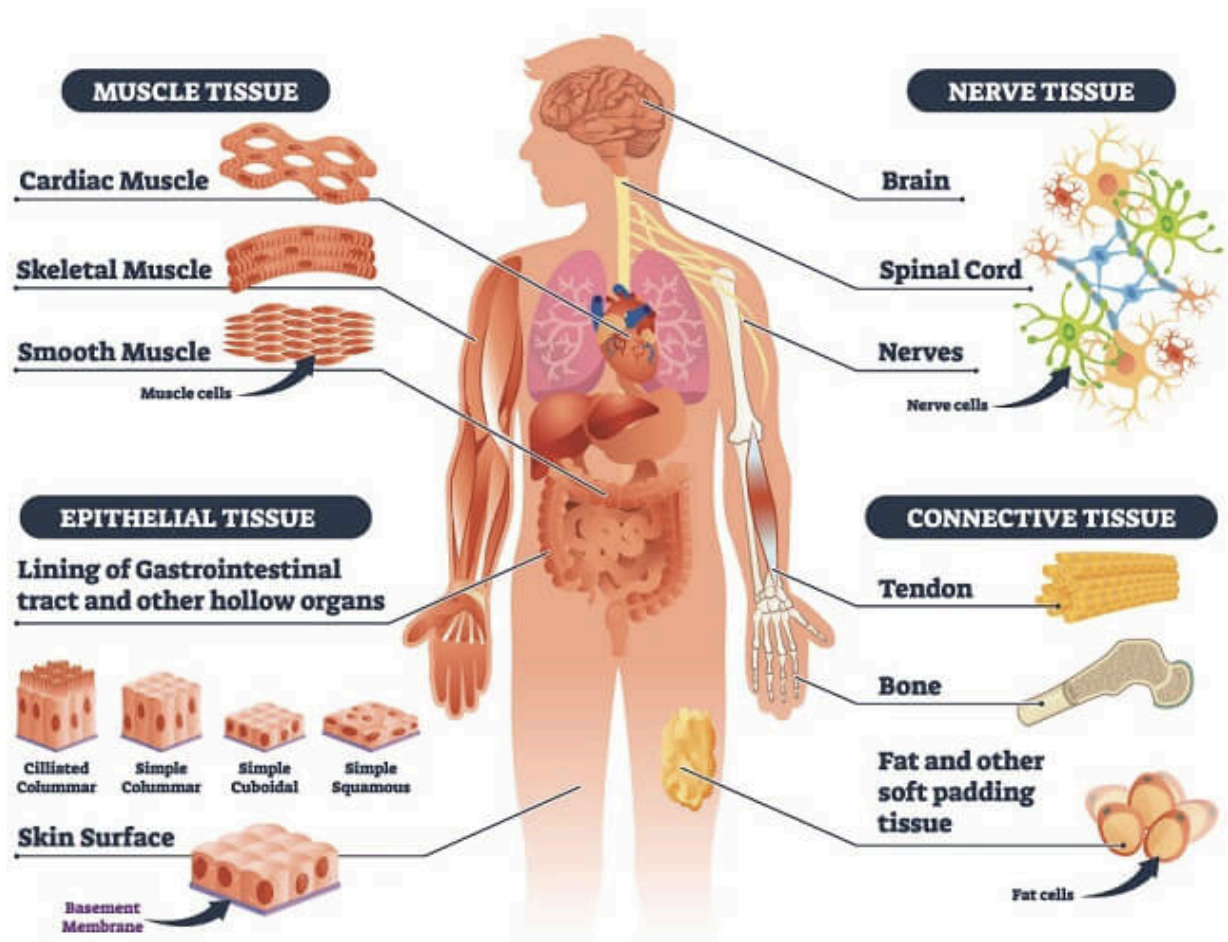

Image courtesy of: <https://biologydictionary.net/connective-tissue/>

Connective tissues are made up of various proteins, which serve different functions within the body. When our genes don't code the instructions for forming connective tissues properly, we can have tissues that are too "stretchy", too fragile, too many or too few of them, etc. In some cases, autoimmune disorders can also affect tissue integrity.

Persons with connective tissue disorders may have a "constellation", or wide range, of symptoms, which may not appear to have anything in common: frequent bone and joint injuries; fragile skin; heart, lung, and digestive system conditions; headaches; muscle, skin, and nerve pain; allergic reactions and feeling faint; hyper-mobile or unusually "bendy" bodies; and many more. But when you look at all the areas of the body that these symptoms encompass, connective tissues literally "connect the issues"!
