From the Principal:
We had a tremendously successful week last week with 56% attendance from our students!! Let’s work to get that number higher this week! Students should join classes and sessions to continue learning, have fun and see their friends! Teachers, ancillary staff and para educators have been working hard all week to develop new and exciting learning plans for our students. This week we will have live instruction from teachers, social/emotional groups with Mr. Bellini and Ms. Renkiewicz, leisure and art with our para educators and Music Therapy with Ms. Renae! We are proud to be able to continue to offer so many opportunities for learning and hope that you will continue to join in these wonderful experiences. It is important that our students continue to grow and develop through these challenging times. We look forward to seeing everyone next week!

Jardon: Building Material/Supply Pick-Up Schedule
If students have personal items to pick up from school please send an email to megan.papasian-broadwell@hazelparkschools.org. An appointment can be set up on Wednesdays for pick ups.

Refund for Spring Camp:
Jardon School is working to get refunds processed for all payments made for Spring Camp. We will keep you updated on when to watch for those refunds in the mail.
Headspace App:

To the people of Michigan: staying inside isn't always easy. That's why Headspace has teamed up with Governor Whitmer to offer a special collection of meditation, sleep, and movement exercises at the link below. This is designed to help you keep a strong and healthy mind in the midst of this global health crisis. All Michiganders — from the shores of Lake Superior to the streets of Detroit — will get through this together.

While this was created for the people of Michigan, anyone can access this collection and we hope you can share it with your community as well.

To access this offering, please simply visit http://headspace.com/mi from any desktop or mobile browser. We recommend trying Google Chrome if you have any trouble with this page. This offering is not accessible through the Headspace app, but you can visit the website through your device's mobile browser.

Please note that you do not need a Headspace account or subscription to access this content. If you currently have a Headspace subscription, you do not need to cancel your subscription to access this content.

If you need any further support, please send an email to help@headspace.com.

Weekly Schedules by Program:
**All Links are accessible through the schedule this week:)**

CAP Weekly Schedule

ASD Weekly Schedule

SXI: Weekly Schedule will be distributed directly by caseload teacher via email
- All schedules are posted on the Jardon Website
- All lesson materials are available on the Jardon Website
- Paper Packets will be mailed to students weekly if requested

IEP Meetings:
- IEP Meetings will be scheduled within the annual timeframe
- IEP Meetings will be done virtually via Zoom. If you would like a different digital platform or a conference call please let us know.
Why is it so important to wash our hands for 20 seconds?

When washing our hands, rub them together vigorously. All parts of our hands must be addressed, especially between fingers and around our fingertips and nails. Friction is what breaks down and destroys the cell walls of COVID19, other viruses and bacteria. Soap, warm water and thorough, correct and lengthy (20 seconds) of hand washing is what we all must be doing to stay safe today and in the future.

Hand sanitizers: As most of you know hand sanitizers with alcohol concentrations of 60% or greater are needed to kill most bacteria and viruses. If you have a choice of hand sanitizer or soap and water always opt for good old fashioned soap and water. You may wonder if 60% is good is 100% better? Well the answer is no. Pure alcohol would evaporate too quickly to effectively kill bacteria/virus on your skin as well as drying it out and causing irritation. Many hand sanitizers now contain emollients to help soften your skin. (20 seconds of friction while hand washing with hand sanitizers is necessary also).

Finally, remember to avoid touching your eyes, nose and mouth with your hands. The virus enters our bodies through these mucous membranes. If you have to touch your face especially when you are out of your house, do so with the inside of your shirt.

Oh, I almost forgot, this virus needs to be close to pass on to others. That is why the CDC states social distancing of 6 feet is so important!
